

The T-Bike

The **T-BIKE** is a trike with a difference. Due to it's design having two wheels at the front, it is compact, extremely stable, easy to adapt and easy to maintain. The transmission is the same as on a bicycle allowing ease of adaptation from, for example a fixed wheel, to a geared free-wheel or a coaster brake etc.

The rider is able to see the width of the trike from the riding position allowing ease of judgment when negotiating gaps. It's compact design makes the overall size markedly smaller than an equivalent traditional trike allowing ease of storage and transport. The component choice is wide and varied and can include a variety of electric assist options.

Specifications

- Mini**
Frame Height 20 cm
Width 63 cm
Weight 10kg
Wheels: 12" front/ 16" rear
- Junior**
Frame Height 30 cm
Width 78 cm
Weight 15kg
Wheels: 16" front/ 20" rear
- ATB**
Frame Height 40 cm
Width 85 cm
Weight 19kg
Wheels: 20" front/ 24" rear
- Senior**
Frame Height 48 cm
Width 85 cm
Weight 19kg
Wheels: 20" front/ 24" rear
